If you suffer with knee pain, listen up!

Speaker #1 (man speaking slightly towards the camera, but as if to be speaking to another camera)

Get this. It's not arthritis or bursitis or even osteoarthritis that's causing your knee pain.

What it is, is simple. It's chronic inflammation. But it's not the kind of inflammation you might be thinking of—

Speaker #1 V/O Video of man in pain (00:12)

<https://drive.google.com/drive/u/1/folders/1JJJIm29sFx0Nj0BUQpQ38agXFhH5m5Zz>

—the kind that happens when you injure your knee and you wake up the next day in agony.

Speaker #1 Same speaker shot from a different, more interesting angle, from the side, with camera in view - (00:17.61)

Chronic inflammation is something that happens at a deeper level and it can wreak havoc on our bodies.

Ramifications like weight gain, loss of muscle mass, and even heart disease can all increase as movement decreases.

And this biting pain can leave us feeling lonely—unable to participate in activities with friends and family, earn a living, or perform simple tasks.

Speaker #2, female, mid 30s, who looks like a doctor or PT looking into the camera (00:40)

You may have heard it said that high blood pressure is the silent killer. Well, I bet you didn't know that inflammation is like the behind-the-scenes cause of so many diseases in our bodies too, from cardiovascular illnesses to the aches and pains in our knees.

But no one talks about it. Not your family doctor, your pharmacist, or physical therapist. So, if no one's telling you about it, how do you address inflammation?

Speaker #2: Looking towards second camera (00:59.89)

First of all, let's examine how inflammation happens. 01:06.73

Speaker #2 V/O graphic of inflammation happening inside the body (01: 08.70)

<https://drive.google.com/drive/u/1/folders/1WcUYviuHeuCpm9tmdiGsZH3IzCWbkHpG>

When you injure yourself, you've actually damaged one or several white blood cells. And lots of other white blood cells come to the rescue by running over and encapsulating the damaged cells. They then release reactive oxygen species, which rip electrons from the damaged cell, effectively destroying it.

Speaker #2: Speaking into camera (01.33.59)

So, we know that inflammation is a normal response to injury, right? Well, here's the problem. If it persists, that inflammation can lead to excessive swelling, excruciating pain, limit your range of motion, and even weaken your muscles, making once simple tasks—nearly impossible.

Speaker #3: Man speaking into camera (01.47.59)

My wife is a retired second grade teacher. Ever since I've known her, she *has loved to dance.*

Video #2: woman showing her dance moves (01:50.00)

https://drive.google.com/drive/u/1/folders/1Jlirx-goHIP-We5Sie5_kBoMxZVQI8WX

I've been a dancer all my life...from tap to choreography and musical theater. Dance is part of who I am.

Speaker #3 (02:04.00)

She was in such great shape She'd dance every day if she could. Literally, there were times I could barely get her to stop —just to make me dinner (giggles.)

Video #3: woman on the couch (02:08.86)

https://drive.google.com/drive/u/1/folders/1Jlirx-goHIP-We5Sie5_kBoMxZVQI8WX

My orthopedist suggested that I try injections but they actually made things worse. I found myself spending the majority of my days curled up the sofa taking painkillers like they were candy.

Speaker #3 speaking into camera (02:24.31)

We tried everything, you name it. From ice to heat, acupuncture to massage—but nothing helped. That's when a friend—who is also an orthopedist—told me about OneCompress Bamboo Knee sleeves.

V/O animation

<https://drive.google.com/drive/u/1/folders/1WcUYviuHeuCpm9tmdiGsZH3IzCWbkHpG>

He explained that they work by compressing the area around your knee, which increases blood flow and circulation, giving you back freedom to move, pain free.

Speaker #3 speaking into camera

He explained that my wife was suffering from bone-on bone knee pain from all her years dancing and that it can be truly debilitating.

V/O Animation

<https://drive.google.com/drive/u/1/folders/1WcUYviuHeuCpm9tmdiGsZH3IzCWbkHpG>

Fluid builds up around the knee, causes swelling, pain, and inflammation. He said people use these sleeves for additional knee support for running, weightlifting, and other activities like dance.

Speaker #3: Speaking excitedly into the camera

Sold!

I ordered a pair right away, even though I was a skeptic, to be honest.

V/O Animation (02:58.14)

<https://drive.google.com/drive/u/1/folders/1WcUYviuHeuCpm9tmdiGsZH3IzCWbkHpG>

When they arrived, I was even more unconvinced. They were so soft and stretchy. I thought, how could anything this flexible help my wife's knee pain? But she agreed to give them a try.

V/O Video / side by side of woman doing chores wearing the sleeves and in pain

<https://drive.google.com/drive/u/1/folders/1OeHAdahWj18Ucxgy8mK3NMGpEqRo8Iz>

They slid right on. So she agreed to keep them for the whole day while she did chores around the house. That was more than I've seen her do in months!

V/O Video of woman

wearing sleeve in bed

<https://drive.google.com/drive/u/1/folders/1OeHAdahWj18Ucxgy8mK3NMGpEqRo8Iz>

That night, she slept with them.

V/O Video of girl with sleeves getting up from her chair wearing sleeve

<https://drive.google.com/drive/u/1/folders/1OeHAdahWj18Ucxgy8mK3NMGpEqRo8Iz>

The next day, she was back to her old self again!

Speaker #2: Speaking into the camera (03;25.38)

In my 10 plus years of dealing with patients with movement disorders due to chronic inflammation, I have never seen a product that works to increase blood flow, decrease inflammation, and get people back on their feet without drugs, or needles, or surgery faster and simpler than OneCompress Knee Sleeves.

Video #4 Woman holding up sleeves

**Speaker #1: V/O Video of man running with little girl on his back
(04:00.29)**

Onecompress™ Bamboo Knee Sleeves have been carefully designed to fit into today's active lifestyles.

Speaker #1 V/O Video of man dancing around happy with sleeve on knee

<https://drive.google.com/drive/u/1/folders/1OeHAdahWj18Ucxgy8mK3NMGpEqRo8Iz>

Speaker #1 V/O Video of man demonstrating sleeves

<https://drive.google.com/drive/u/1/folders/1OeHAdahWj18Ucxgy8mK3NMGpEqRo8Iz>

The most comfortable compression material on the market, the bamboo not only relieves inflammation and the pain, numbness, and swelling that goes along with it, but they're soft, thermoregulating, naturally moisture wicking, eco-kind, and hypoallergenic.

Speaker #1 V/O woman rolling over in bed wearing knee sleeves

<https://drive.google.com/drive/u/1/folders/1OeHAdahWj18Ucxgy8mK3NMGpEqRo8Iz>

And here's the best part—they're actually made to be worn while you sleep

—

Speaker #1 speaking into camera

That's right. Wear your knee sleeves to bed at night and allow these babies to do their magic. When you wake up the next day, you'll notice a difference after night one. And it'll just keep getting better every day.

But you don't have to take my word for it! Watch these amazing testimonials from real customers.

Testimonial #1: UCG Clip (04:18.00)
